## Math book grade 10 pdf

Powered by Squarespace @mathematicsprof/Twitter Some students love math — others not so much. In fact, some students find math to be difficult and dislike it so much that they do everything they can to avoid it. Math may feel a little abstract when they're young, but it involves skills they will need in life long after they're out of school. That makes math important for more than just a grade on a report card. Whether you're a parent helping your child at home or a teacher in the classroom, tackling the process with the right teaching methods can make a huge difference. If you're not sure where to start, take a look at these time-tested ways to help students with math. Build Confidence Some students who struggle to understand certain math concepts become discouraged and start believing that math simply isn't for them because they aren't any good at it. While it's certainly true that some students understand math concepts more quickly than others, everyone can learn math with the right techniques and tools. Work to build confidence from the outset — perhaps with a fun game that reinforces beginning math concepts — to ensure you take that fundamental first step to helping your child learn and succeed. @MathCoachCorner/Twitter Encourage Curiosity Big ideas in math tend to naturally inspire curiosity, but curiosity is a valuable tool even for basic concepts. For example, if students are struggling to understand how a fraction with a larger number on bottom could be smaller than a fraction with a smaller number on bottom, introduce some real-life items — like maybe large cookies — and let them explore the differences between dividing something into 10 pieces versus dividing it into four pieces. @MathCoachCorner/Twitter Additionally, letting their curiosity guide them gives them a chance to discover their own passions for the particular subjects they may enjoy most. Be sure to encourage curiosity and questions at all times, especially when you're helping them with new or challenging concepts. Raise the Bar Okay, every student won't fall in love with math, even after you build their confidence and show them they can learn it. As a result, some may try to get away with only doing the bare minimum to get a passing grade. Don't let them do it! Instead, raise the bar with even bigger challenges to send a powerful signal that they are always expected to do their best. @mathematicsprof/Twitter Plan in Advance For most parents, students bring home specific items as homework, and they simply need to be prepared to help with what they're given. However, teachers and parents who homeschool follow a curriculum. When that's the case, it's vital to look at the topics students need to know for their exams, and it takes some advance planning to make sure you cover all of them in detail. Don't forget to include plenty of time for questions and allow them time to truly understand the concepts before moving on to the next topic. @MathCoachCorner/Twitter Apply Math to Real-World Scenarios When you talk to students, it becomes clear that one of the key problems with math for many of them is that it just seems too abstract for them. They feel that way because they don't understand all the ways math relates to daily life in the real world — so show them! Applying equations, formulas and geometry to common tasks they can see and participate in helps students understand just how important math is in our lives. @mathematicsprof/Twitter Be Positive Kids' brains are like sponges, and they absorb all kinds of remarks and suggestions from adults — both positive and negative. It's critical to be vigilant about what you say when it comes to talking about math and helping them with it. Even if you start to feel frustrated yourself, take a short break to relax and then seek guidance from online sources or another person to help you figure it out. Above all, stay positive and don't express a negative attitude that your child is likely to mimic. With a positive approach, you might be surprised to see how much progress your child starts to make. @MathCoachCorner/Twitter Personalize Math Assignments Numbers sometimes work in very interesting ways. In short, that means some problems can be solved in more than one way. Giving students some control over how they learn allows them to adapt and incorporate their strengths, and it also conveys your belief in their ability. For example, instead of just giving them an exercise or worksheet to complete, you could prepare several different exercises and let them choose what they want to do. They are far more likely to be enthusiastic about a task they gave themselves. @memesxmoney/Twitter Prioritize Understanding, Not Memorization In the academic world, too much emphasis is sometimes placed on memorizing information for exams. That might work in a history class, but for math, it's critical to really understand the mathematical concepts to achieve long-term success. If you don't encourage understanding over memorization from the beginning, students could find themselves on shaky foundations as the math gets progressively harder. @MathCoachCorner/Twitter Reward Progress No matter what subject you're working on with your child or student, it's important to reward progress. In the sports world, this often comes in the form of medals or trophies. Don't put off giving them rewards for their hard work! They shouldn't have to wait until they achieve big things like getting A's on report cards and outstanding test scores. Reward your student as you go with simple but cool treats like setting up a math game to play on a computer or mobile device in place of a regular study session. They will enjoy it a lot more than a certificate or badge. @MathCoachCorner/Twitter Collaborate with Teachers and Parents Whether you're a teacher or a parent, it's always a good idea to collaborate with each other. This will keep you on track and help you get past hurdles quickly. Teachers should keep parents informed about exactly what they've been doing in class, while parents — who are generally the ones called on to help out at home on a more one-on-one basis — should seek guidance from teachers and inform them of any problem areas that are particularly challenging. @mathematicsprof/Twitter MORE FROM QUESTIONSANSWERED.NET Photo Courtesy: MoMo Productions/Getty Images Reading is important for kids of all ages, whether they're reading on their own or hearing stories from teachers, parents and the other adults in their lives. It's especially important for first graders because they're still learning language, and reading helps them understand the sounds and patterns words make. You can shop for books in stores, check them out from libraries and even buy them online, but you can also find free or inexpensive digital books for kids online. Reading them is as easy as visiting one of these websites. Some may require a membership signup, but for most of them, you can go straight to the link and start reading. Wilbooks/Wilbooks offers free digital books for kids ages pre-K through third grade and reading levels A through M. You can also sort their books by collection or series. For example, there are books that are Common Core-approved, Spanish language books, joke books, alphabet books and more. Photo Courtesy: Catherine Falls Commercial/Getty Images Many of the books are free to read online. However, for a monthly fee or annual subscription, you can receive physical books in the mail and access educational printables. Individual, school and classroom accounts are all available. If you want to stick to the dozens of free books available, click on the one you like, and it will appear in a pop-up window. Once it does, you can start reading. FunBrainAt FunBrain, you'll find a selection of books for elementary and middle grades, including some of the popular books and series that kids love the most. Look for titles like Judy Moody, Diary of a Wimpy Kid, Smashie McPterter, Amelia, Stink and more. Each title gives a suggested grade level range. Photo Courtesy: Povilas Baltinas / EyeEm/Getty Images However, if you're reading with your child, you may find that you want to work your way through all of the books, even the ones for older kids. The FunBrain site also has games for kids of ages and videos like Kidz Bop, Teen Titans Go! and Highlights Kids. It also has informative videos on topics like getting along with siblings or dealing with bullies. The site even has a section on math. Oxford OwlCreated by Oxford University Press, Oxford Owl offers a free site for parents and children to use at home, as well as a membership version for teachers and schools. The home version offers a free eBook library for kids ages 3 to 11, including both fiction and nonfiction. Photo Courtesy: Klaus Vedfelt/Getty Images You can also browse by series or Oxford Reading Level. Beyond books, the Oxford Owl site offers a blog with advice for parents and kids on topics like summer reading and what to expect when school starts. There are math games and phonics guides, and you'll find a selection of activities to do at home, sorted by age and grade level. Storyline OnlineOne of the most well-known sites where you'll find free online books for kids is Storyline Online. It's won several awards, including an Emmy, and it's been endorsed by the American Library Association. Photo Courtesy: Westend61/Getty Images The site is filled with some of the most popular kids' books, and rather than read them yourself, you can watch a video of a celebrity like Kevin Costner, Eva Longoria or Betty White read them to you. Each book has its own activity guide, and you can buy the books from the site if you'd like to own a physical copy. International Children's Digital LibraryThe International Children's Digital Library has one of the biggest selections of kids' books online. Choose from more than 4,000 titles in approximately 60 languages. You can narrow the selections down by age, length of book, topic and other categories. Photo Courtesy: Maskot/Getty Images You can even search for books that are from each continent. If you sign up for a free account, you can create a virtual bookshelf with your child's favorites so that you can find them easily when you want. MORE FROM QUESTIONSANSWERED.NET
